THREE PRODUCT SURFACES

XRGUILD.ORG

The marketing site — poster-bloom hero, four-programme grid, events rail, membership band. Home, events and join, click-through.

LIBRARY.XRGUILD.ORG

Library 2.0 — the nine real content categories in the sidebar, and an article page with the intro video and contact points.

XR GUILD HALL

WebXR entry gate with comfort switches, and the in-world HUD: twelve-doorway rail, plaque, stage screen, pillar panel.

IMMERSIVE

IN A WORLD, PIXELS STOP BEING THE UNIT

Spatial surfaces are sized in dmm and degrees of visual angle. The fill is decided by the display, never by taste — and on additive smartglasses the Guild's black-and-purple identity is invisible, so gold and white become the brand there.

VR · OPAQUE

Full palette. Opaque plate at 88%.
The Hall's primary target.

AR · PASSTHROUGH

Unknown room behind. 78% scrim
minimum; white or gold text.

GLASSES · ADDITIVE

Black renders as nothing. No fills —
white and gold strokes only,
2.5dmm minimum.

PRINCIPLES POSTERS

SEVEN PRINCIPLES, SEVEN WINDOWS

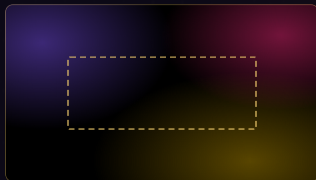

Art nouveau ogee window, labradorite field, gilt frame. Every contour is a tapered ribbon — swelling at the middle, dying at both ends — which is the period's line grammar.

1080×1528, printable, and sized to hang as the Hall's stained-glass panels. Text is verbatim from principles.xrguild.org, CC BY.
